INTRODUCTION

WHY DOCUMENTATION MATTERS

INTRODUCTION CONTINUED...

- Creates uniformity and promotes knowledge sharing
- Creates consistency in processes and standardizes procedures
- Essential for quality and process control
- Increase efficiency and security

BENEFITS

DOCUMENTATION IS GOOD

POSITIVES OF DOCUMENTATION

- Preserve institutional knowledge
- Improve training and onboarding
- Enhance workflow efficiency
- Ensure compliance and reduce risk
- Reduce resolution time and improve customer satisfaction

DRAWBACKS

THERE CAN BE TOO MUCH OF A GOOD THING

NEGATIVES OF DOCUMENTATION

- In today's world we face the challenge of information overload.
- We want to ensure we are only making documentation for process and procedures that are critical and archiving any that are no longer used or needed.
- More documentation means longer search times and more labor spent keeping these updated.

IMPLEMENTING DOCUMENTATION PRACTICES

1. Use the Documentation Playbook to reference structure and layout. This will ensure all documents across the organization are cohesive.
2. Ensure adequate approval and documentation publishing practices are established and tested.
3. Always review and update based on what works for the team or organization.

DOCUMENTATION IMPACT

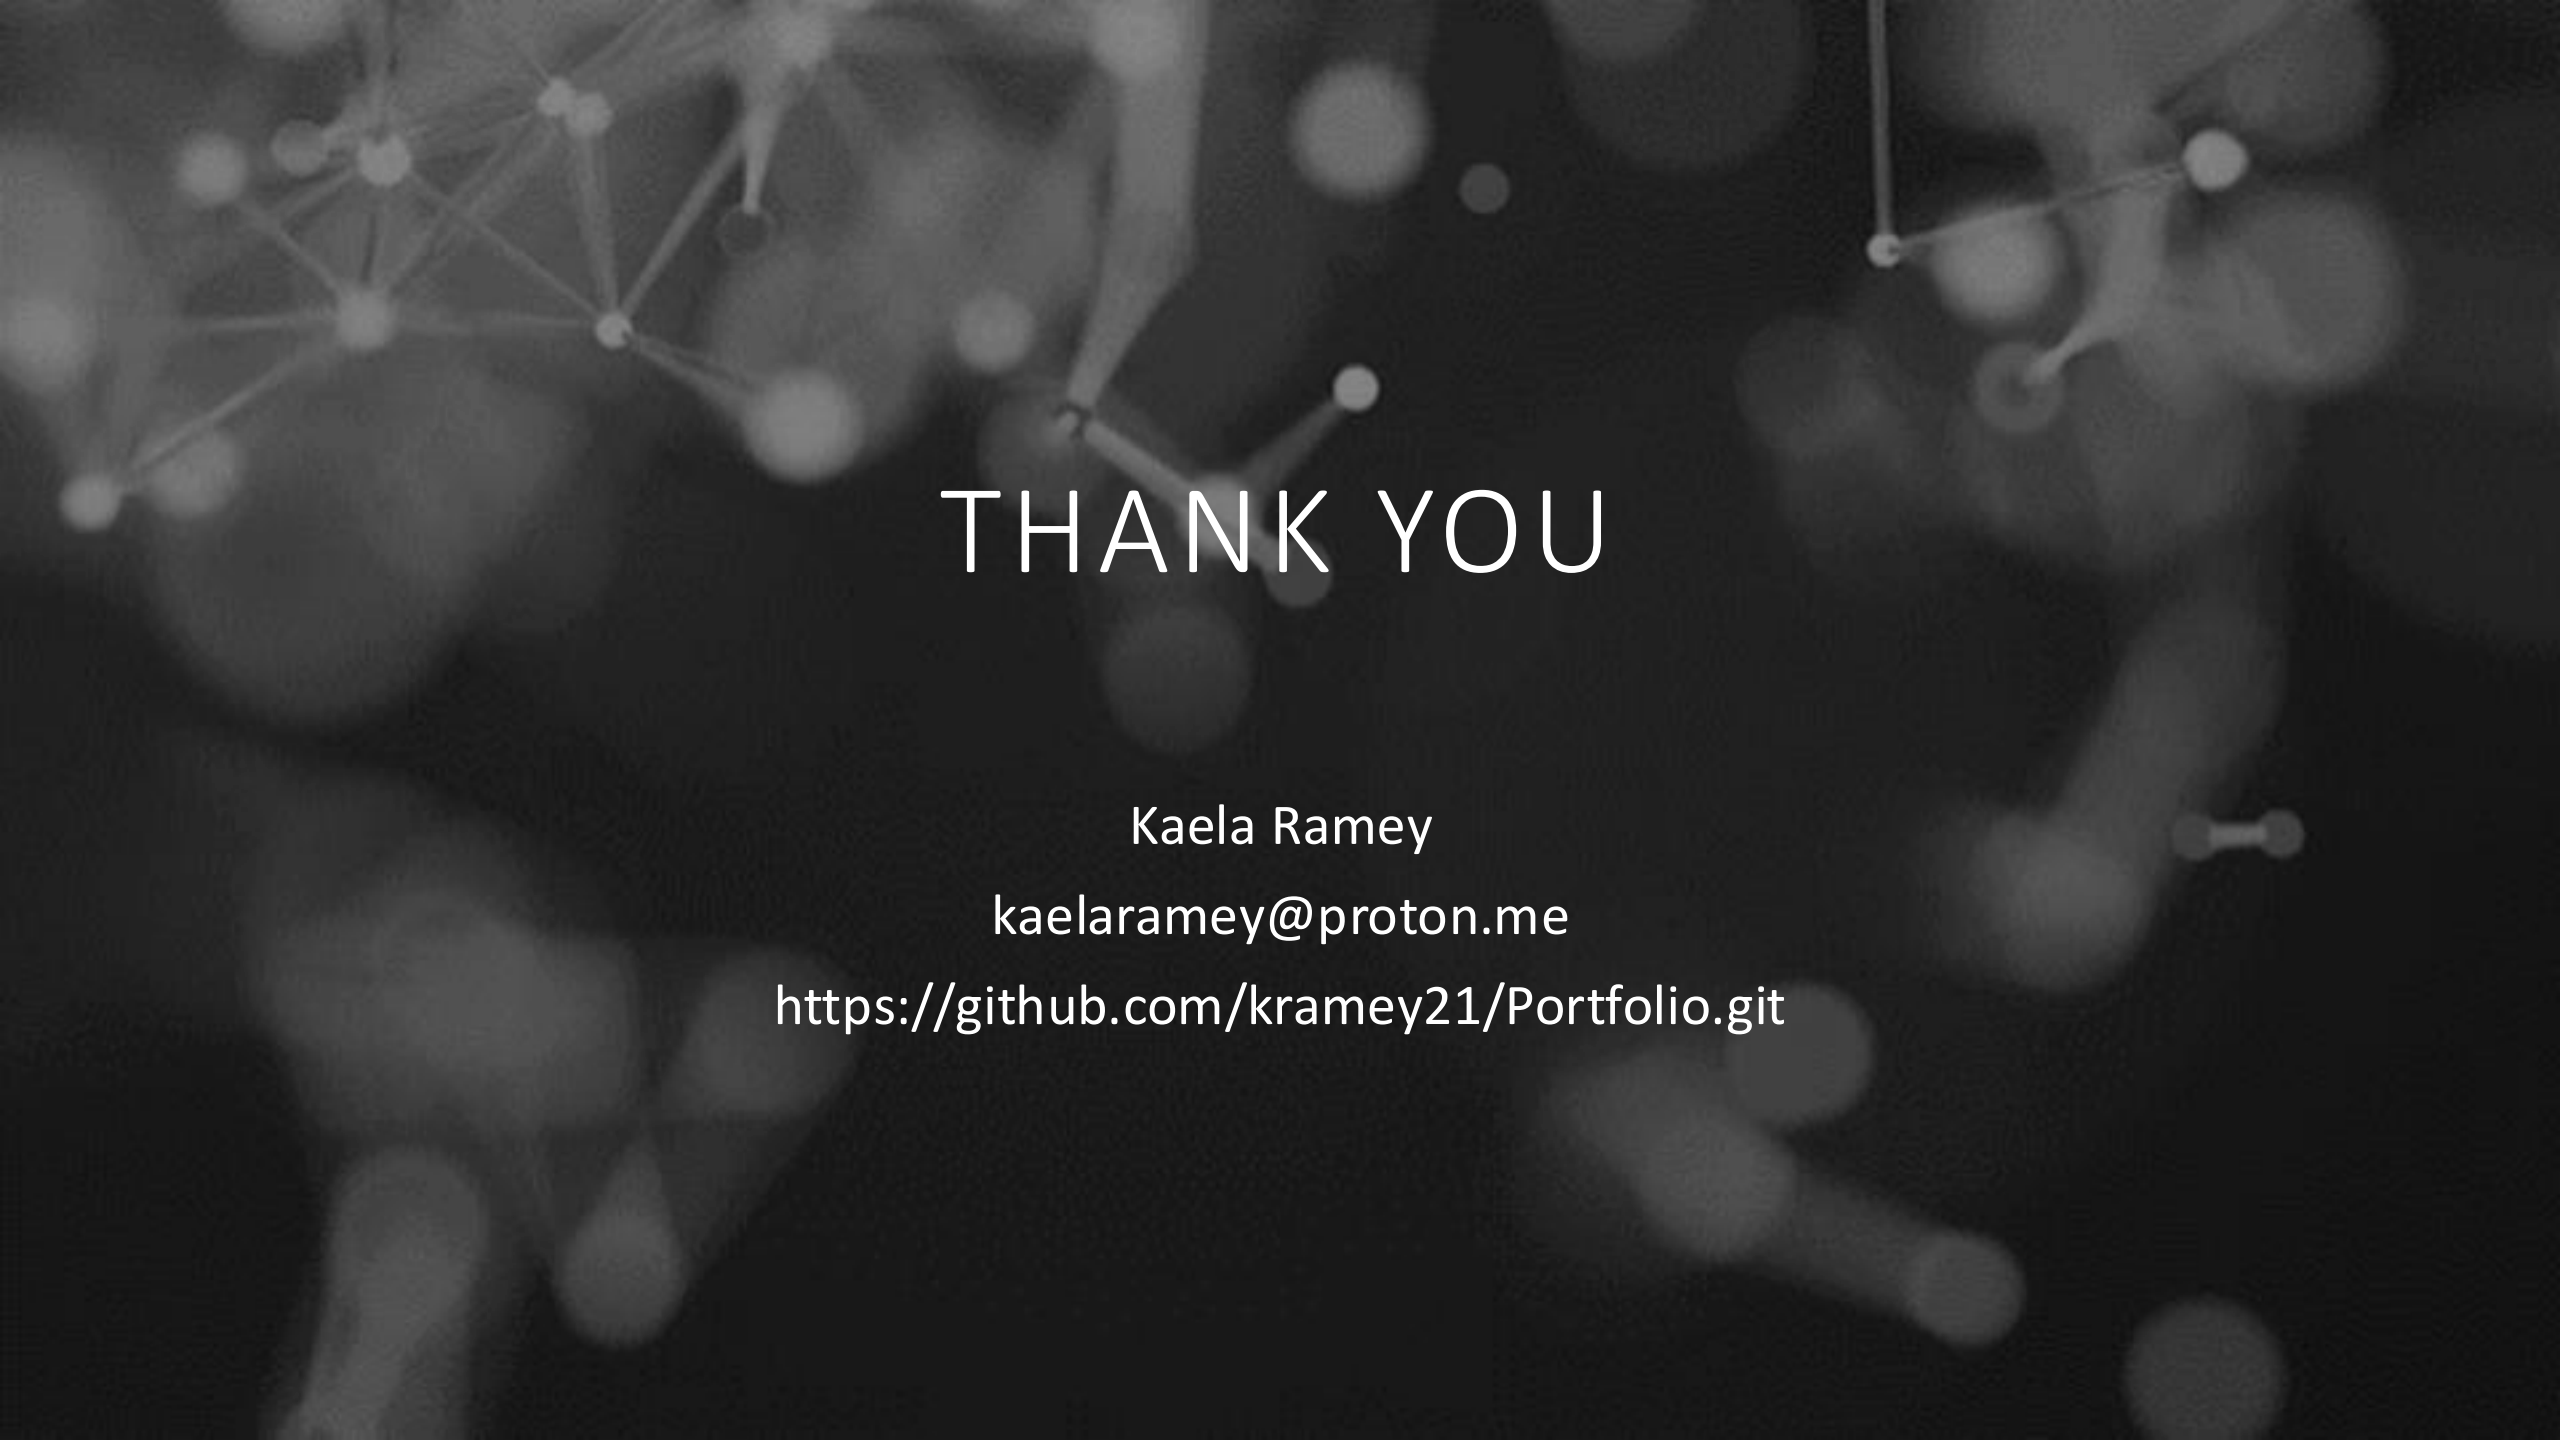

Review the impact documentation had with KPIs and user feedback to see what works and what didn't. Update policies and procedures regularly to reflect this.

THE POWER OF COMMUNICATION

DOCUMENTATION STATISTICS

- According to a Forrester report commissioned by Adobe, 97% of organizations had minimal or no digital document process.
- The Data Warehouse Institute reported that data entry errors in procurement, supply chain, and other areas cost businesses over \$600 billion each year.
- Knowledge workers spend on average 50% of their time creating and preparing documents. Without a document management strategy and a reliable system, 25% of these documents will end up being lost.
- Business.com reported 83% of employees recreate missing documents.
- AWW conducted a study that revealed a regular-sized company can save time spent in manual file sharing by up to 80% when using Document Management Systems.
- Signhouse reported that Fortune 500 companies in total lose an average of \$12 billion per year due to inefficiency caused by unstructured document management.
